

Π26 - Cookie Policy

The following information explains how Krypto Security (Cyprus) Ltd uses cookies and other similar technologies on this website.

What is a Cookie

A cookie is a small piece of data (text file) that a website asks your browser to store on your device to remember information about you, such as language preferences or login details. These cookies are set by us and are called first-party cookies. We also use third-party cookies – which are cookies from a domain other than the domain of the website you are visiting—for advertising and marketing purposes.

Why do we use cookies and similar technologies?

Cookies perform many different tasks, such as allowing you to navigate efficiently between pages, remembering your preferences, and generally improving the user experience. They can also help ensure that the ads you see online are relevant to you and your interests.

More specifically, we use cookies and other tracking technologies for the following purposes:

- To help you navigate.
- To assist with registering for our events, logging in, and your ability to provide feedback.
- To analyze your use of our products, services, or applications.
- To support our promotional and marketing efforts (including behavioral advertising).

We classify the cookies we use into the following categories:

Strictly necessary cookies. These cookies are essential to allow you to navigate the website and provide certain features you have requested. For example, to save products you have added to your shopping cart.

We do not need your consent for these cookies.

Functional cookies. These cookies ensure that the website remembers your preferences (e.g., your name, language, and location) and offers improved and personalized features.

For example, the website may provide local weather forecasts or traffic news by using cookies to store information about your current location, saves changes to font size, font type, and other customizable parts of the website, and provides you with services you have requested, such as watching videos and posting comments on a blog.

Π26 - Cookie Policy

The data stored by these cookies may be anonymous, and these cookies cannot track your browser's activities on other websites.

We do not require your consent for these cookies.

Performance and analytics cookies. These cookies collect information about how the website is used. For example, which pages you visit most often and whether you receive error messages from them.

These cookies do not collect information that would identify you.

All data collected by these cookies is aggregated and therefore anonymous.

This data is used solely to improve the functionality of the website.

Marketing Cookies - Advertising. These cookies are used to (1) deliver ads that are more relevant to you and your interests; (2) limit the number of times you see an ad; (3) help measure the effectiveness of the advertising campaign; and (4) understand people's behavior after they see an ad.

They are typically placed on behalf of advertising networks with the website operator's permission. They remember that you have visited a website and are often linked to the website's functionality provided by another organization.

You can opt out of any cookie category (except for essential cookies) by clicking the "Cookie Settings" button.

Within these four categories, cookies are classified as either session cookies or persistent cookies.

"Session" cookies are temporary and are deleted from your device as soon as you close your browser window.

"Persistent" cookies remain on your device for a longer period of time and are used by the website to recognize your device when you return.

List of cookies we use:

Cookie	Description	Duration
Necessary		
Cookie __cf_bm	This cookie, set by Cloudflare, is used to support Cloudflare Bot Management.	1 hour

You can block cookies by enabling the setting in your browser that allows you to refuse all or certain cookies.

What are your options regarding cookies?

If you do not want information to be collected through the use of cookies, there is a simple process in most browsers that allows you to automatically reject cookies or gives you the option to refuse or accept the transfer of a specific cookie (or cookies) to your computer from a specific website.

If you wish to delete cookies or instruct your browser to delete or refuse cookies, please visit your browser's help pages.

If you wish to manage your cookies, please access and manage your subscription/preference settings via the links below.
